Decoratives

புரிசைபின் வலிமை

iamstrongest

iamsafest

Simply put, a veneer is a thin slice of cover or coating over the plywood board. Veneers are predominantly decorative in nature and impart the texture and hue of choice for the end user. There is virtually no limit to the decorative applications of veneers - these range from interiors to enriching furniture and even smaller wooden objects, down to musical instruments.

Sharon Veneers are broadly classified into four: Exoti Natura, Exoti Presto, Exoti Serena and Exoti Aura. Exoti Natura, Exoti Presto and Exoti Serena are veneer crafted from natural wood, bearing the uniqueness of the tree it originated from. Exoti Aura is veneer made of reconstituted engineered wood.

SharonPly uses advanced technology to manufacture veneers. Veneer sheets are bound together by knitting hot melt springs. Once the sheets are joined, they are then pasted on the base ply. Thus, an additional level of process is incorporated rather than simply pasting veneers, in order to ensure optimum adhesion.

All veneer categories offer remarkable consistency in quality & texture.

Exoti Natura

Nature's Unique Imprints

Sharon Exoti Natura – the entrancing new and fabulous range of natural veneers. This exotic range is sourced from sustainable forests of Africa, South East Asia, Europe and America. Inspired by the diversity in nature, this range showcases an exquisite selection of natural veneers that have been crafted to perfection by our experts, to give a superior touch to your interiors.

KEY FEATURES

- Base is of 100% Gurjan ply which is perceived to be the best in market due to its natural resistance to insects and higher density (600 to 650 Kg/m³).
- IS: 1328 includes use of adhesive conforming to IS: 848; base ply conforms to IS: 303.
- BWR Grade (IS: 303 – 1989) certification of plywood (water resistant) provides dimensional stability and ability to withstand varying environmental conditions.
- Kyoto Pro-Tech treatment with preservatives renders the product toxic against borers & termites.
- Joints made with adhesives conforming to IS: 848 – 2006 aids water resistance for a longer period.
- Compliance to BIS (Bureau of Indian Standard) norms for superior product quality renders it suitable for government projects and wherever BIS compliance is required.
- Provides eco-friendly benefit by being E1 formaldehyde emission level complaint. By using material and around the region, it supports local economic growth.
- Conforming to ISO 9001, the manufacturing process is certified by DNV which is accepted worldwide.
- Conforming to ISO 14001, the product is manufactured under legal environmental compliances hence meets the standard parameters.
- 7 Year Warranty* against borer and termite attack.
- VIRASAFE: A specially designed surface treatment with Activated Nanoparticles that makes the product over 99% virus safe.

Exoti Presto

Sharon Exoti Presto is a premium product composed of poly-fibre grains, layered upon a decorative veneer, sealed with epoxy and pressed on Gurjan matt. This is one of our latest offerings.

KEY FEATURES

- Base is of 100% Gurjan ply which is perceived to be the best in market due to its natural resistance to insects and higher density (600 to 650 Kg/m³).
- BWR Grade (IS: 303 – 1989) certification of plywood (water resistant) provides dimensional stability and ability to withstand varying environmental conditions. IS: 1328 includes use of adhesive conforming to IS: 848; base ply conforms to IS: 303.
- German Sanding Technology ensures smooth surface, facilitating easy polish with less time, labour and costs.
- Kyoto Pro-Tech treatment with preservatives renders the product toxic against borers & termites.
- Pre-coated/Ready to Polish – Exoti Presto comes pre-coated with a layer of epoxy sealer:
 - a. This enhances the grain design thereby rendering a super-premium look.
 - b. Since it comes with a layer of epoxy sealer, it saves on time as well as cost, since it can be taken to polish straightaway.
 - c. It protects the veneer surface from any kind of handling damages.
 - d. The epoxy sealer is compatible with all kinds of polishes which are Melamine, PU and Polycoat.
- 7 Year Warranty* against borer and termite attack.
- VIRASAFE: A specially designed surface treatment with Activated Nanoparticles that makes the product over 99% virus safe.

Exoti Aura

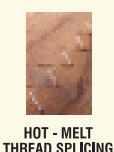

Many shades of Imaginations

Open up to a world of hues that defy imagination, with Sharon Exoti Aura. Made of reconstituted man-made wood, Sharon Exoti Aura offers remarkable consistency in grain, pattern and colour. This renders it perfect for a remarkable choice of shades that lend beauty and individuality to your interiors.

KEY FEATURES

- Easy to work and offers value for money.
- Being a BIS Complaint Product, the product quality is superior, hence suitable for government projects.
- German Sanding Technology ensures smooth surface, facilitating easy polish with less time, labour and costs.
- Precise edge cutting and Seamless jointing processes create flawless joints and make for continuous sheet with lesser chance for gaps.
- Kyoto Pro-Tech treatment with preservatives renders the product toxic against borers & termites.
- Adhesive conforming to IS: 848, is evenly spread leading to appropriate bonding of joints that lasts long and moisture resistant.
- Comprehensively confirms to IS: 1328. Quality checked for appropriate base ply (IS: 303), moisture resistance, square-finishing to facilitate easy fixing of sheets, dimensions and tolerances, finish and other parameters.
- Eco-friendly product. Renewable natural wood sources made from fast growing plantation/harvested timbers.
- Stringent process quality checks that follow ISO 9001, ISO 18001 & ISO 14001 standards. Meticulous quality inspection during Drying, Sorting, Cutting, Pressing, Conditioning & Jointing Processes, ensures superlative final product and consistent quality in every sheet of Sharon Veneers Exoti Aura.
- 7 Year Warranty* against borer and termite attack.
- VIRASAFE: A specially designed surface treatment with Activated Nanoparticles that makes the product over 99% virus safe.

TEAK

A cut of Royalty

Teak, also known as Burma Teak (*Tectona grandis*) is a species defined by its golden brown colour, coarse texture and straight grain. Teak's colour varies from light golden brown to dark brown with fine, dark, contrasting stripes of lines. May be plain, self-coloured or overlaid with narrow dark lines.

Most logs are flat sliced or first cut into thirds or quarters in order to produce as much crown/quarter material as possible, with some rift cut production where good runs of straight grain are needed. Moreover, its crown cut has a nice tone with interesting cathedrals and the mineral streaks provide a contrasty grain structure in the cathedral pattern, much like American Walnut.
