

Exoti Serena

Species used:
Straightline Noir

Exoti Serena

Exoti Serena range from SharonVeneer is a harmonious combination of natural beauty and human craftsmanship. High quality veneers are sourced from exotic sources, and are enhanced with our in-house treatments. Ultimately, this results in a more natural aesthetic.

Species used:
Decalage Noir

Features

- Being a BIS Complaint Product, the product quality is superior, hence suitable for government projects.
- German Sanding Technology ensures smooth surface, facilitating easy polish with less time, labour and costs.
- Precise edge cutting and Seamless jointing processes create flawless joints and make for continuous sheet with lesser chance for gaps.
- Kyoto Pro-Tech treatment with preservatives renders the product toxic against borers & termites.
- IS: 1328 includes use of adhesive conforming to IS: 848; base ply conforms to IS: 303.IS 848 – 2006
- Conforming to ISO 9001, the manufacturing process is certified by DNV which is accepted worldwide.
- Conforming to ISO 14001, the product is manufactured under legal environmental compliances hence meets the standard parameters.
- Eligible for LEED Point
- VIRASAFE: A specially designed surface treatment with Activated Nanoparticles that makes the product over 99% virus safe.

Advantages

- MR Grade
- Use of adhesive conforming to the norm for excellent adhesion
- Less effort and time in processing
- ISI marking
- Contributes 1 LEED point
- No blister & delamination
- Ensures smooth finish post polishing
- Ability to withstand varying environmental conditions
- Provides dimensional stability
